

Guide the Future of Broadband Join the FTTH Council Europe now!

Join the group of leading telecommunications companies that drive Europe into a prosperous future! The FTTH Council Europe is a market development organisation devoted to **accelerating the FTTH adoption by all broadband stakeholders through education and promotion in order to enhance the quality of life, contribute to a better environment and increase competitiveness**. Its members, more than 110 companies and academic institutions, work together towards the fulfilment of this mission.

Members of the FTTH Council Europe benefit from:

Exclusive access to market data:

In addition to the market statistics that we publish, we have detailed analysis of these statistics that are only available for members. This includes detailed lists of FTTH projects in Europe including their actual status, plans and strategies.

Exclusive access to analysts' data:

The FTTH Council Europe works together with well-known analysts on several studies such as sustainable development, broadband usage or cost models for FTTH networks. As a member you are informed about the results before the public and you have access to background data and details that are not available to the public.

Unique networking opportunities:

By joining one of our Working Committees you are able to work together with experts from all the leading FTTH related companies in Europe. Benefit from new contacts, open discussions and new insights! Perfect visibility at THE FTTH Conference in Europe:

Our annual conference is THE meeting point for all people interested in FTTH in Europe. Sponsorship and exhibition space is exclusively offered to our members!

Create the future of FTTH:

By actively participating in our community you are able to take part in the process of accelerating FTTH deployments in Europe. The choice is yours: watch the development or be part of it!

All ICT hardware/software vendors, application or content providers or other suppliers, academia and non-profit organisations can apply to join the Council by submitting a request through the Council's secretariat. The cost per calendar year for membership is € 5,000.

Apply online on our website www.ftthcouncil.eu in the membership section.

Taking Your Life To New Horizons The FTTH Conference

24th - 25th February 2010
Feira Internacional de Lisboa
Lisbon, Portugal

The FTTH Council Europe has the pleasure to invite you to the 7th edition of its annual Conference on the latest evolutions in the fibre industry.

Our 2010 conference will be a worthy successor to the last edition in Copenhagen, which united more than 2.200 visitors, 74 authoritative speakers and over 70 leading exhibitors with top quality content and valuable networking opportunities.

This two-day landmark event, which generated an overall satisfaction rate of more than 90% last year, will allow participants to deepen their knowledge of a wide range of fibre-to-the-home related topics such as regulatory and policy affairs, technical progress, content and services, environment and many more.

The speaking sessions will be illustrated by both European and international success stories from top industry experts addressing fibre deployments around the globe. Share their professional knowledge in the exhibitors' hall which will allow you to acquire hands-on experience with the most recent high technological fibre solutions.

"FTTH is one of the prime forces of innovation and therefore a crucial factor for bringing Europe out of recession. That is why I invite you to our 2010 FTTH Council Europe Conference in order to learn about the current state-of-play regarding this key driver for economic stimulus, environmental sustainability and quality of life. Join us in Lisbon to interact and share experiences with leading industry experts, vendors, telecom operators, policy makers, media and analysts!"

Karel Helsen
President of the FTTH Council Europe
